Marion, IL --

Beginning today (Monday October 26, 2015), crews from the Dixon Springs Boot Camp will be working various roadways in Williamson County to assist us in all our efforts to clean up trash and debris from our roadways. As these crews work areas in the county, we ask that motorists; drive with caution, stay alert, beware of their location and drive safely as they will be moving through various locations throughout the day.

This effort is on top of all the work our Adopt A Highway partners do to clean up the Williamson County roadways. We truly appreciate the time and effort all our volunteers do in this effort.

It is our hope that through these partnerships and additional measures we can make our roadways cleaner and our communities a better place to live and work. These crews will have high visibility vests, orange bags, traffic control, and a flagger to help alert traffic to conditions.

Please use caution and drive safely through the work areas when you see these crews out along the roadways!

Putting Safety First!!
